Ahmed Bahaa

Discussion 2

1-using double quotes is better cause it gives you the ability to print variables without needing concatenations

2-parce error

```
3-<!DOCTYPE html>

<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Document</title>
</head>
<body>
    <?php
    include("sab.php");
    aha();
    ?>
</body>
</html>
```

Sab.php:

```php
<?php
function aha(){
$x=[1,2,3,4,5];
echo "$x[2]";
echo "<br>";
echo "$x[3]";
}
?>
```
